INTRODUCTION

Unifarm Engineering Pvt. Ltd., established in 2011, is a multidisciplinary engineering and infrastructure consultancy firm committed to building a stronger, more sustainable India. From planning and executing civil and electrical projects to handling state-level surveys and technical documentation, Unifarm Engineering operates at the intersection of innovation, precision, and impact.

ABOUT UNIFARM

OUR SERVICES

- SPORTS INFRASTRUCTURE
- WATER & ENVIRONMENT
- SEWERAGE AND DRAINAGE
- TRANSPORTATION
- IRRIGATION
- BUILDING AND URBAN PLANNING
- THIRD-PARTY QUALITY INSPECTION

SPORTS INFRASTRUCTURE

- We specialize in conceptualizing and designing cutting-edge sports complexes.
- We provide detailed architectural and structural plans for all facility types.
- Designing and overseeing the installation of specialized sports flooring, seating, and lighting systems.

WATER AND ENVIRONMENT

- Planning, design, and supervision of water supply systems.
- Environmental impact assessments and sustainable water resource management.
- Stormwater management and flood risk mitigation.

SEWER AND DRAINAGE

- Design and execution oversight of sewerage networks and treatment plants.
- Urban and rural drainage system planning for flood prevention.
- Rehabilitation and modernization of existing sewer infrastructure

TRANSPORTATION

- Feasibility studies, detailed project reports, and design of roads, highways, and bridges.
- Urban traffic management and transport planning solutions.
- Quality control and monitoring during construction.

IRRIGATION

A large center pivot irrigation system is shown in operation over a lush green field. The system consists of a long, straight metal pipe supported by a series of metal trusses. From these trusses, vertical pipes extend down to the ground, where multiple nozzles are spraying water. The water creates a fine mist that hangs over the crops. The field is filled with rows of green plants. In the background, there is a line of trees under a clear blue sky with a few wispy clouds. The overall scene is bright and clear, suggesting a sunny day.

- “
- Design of canal systems, pumping stations, and irrigation networks.
 - Modernization of existing irrigation systems for efficiency.
 - Water conservation and precision irrigation solutions.
- ”

BUILDING AND URBAN PLANNING

- Architectural and structural design consultancy for residential, commercial, and public buildings.
- Urban master planning and infrastructure integration.
- Green building design and compliance with sustainability standards

THIRD-PARTY QUALITY INSPECTION

- Independent quality assurance and inspection during all project stages.
- Material testing, construction supervision, and compliance checks.
- Certification and reporting for regulatory approval.

OUR DESIGN PHILOSOPHY

Context-Sensitive Solutions

Designs that respect and reflect the local environment and culture.

Local Materials and Craftsmanship

Prioritizing the use of local resources and traditional skills.

Ecological Impact Reduction

Minimizing environmental footprint through sustainable practices.

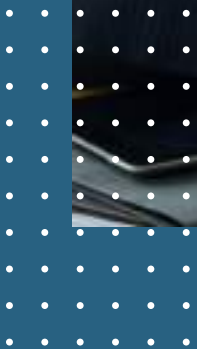

Universal Accessibility

Ensuring inclusive infrastructure for all visitors.

COMPANY VALUES

- Core Values What They Mean
- Integrity Transparent operations, ethical practices
- Precision Engineering Survey-to-site execution with high technical accuracy
- Regional Adaptability Custom solutions based on terrain, culture, and demand
- Speed & Accountability Timely project delivery with measurable results
- Grassroots Empowerment Local employment, capacity-building, and training

Company Values

one

Integrity

- Building trust by consistently doing the right thing, being honest, and maintaining high ethical standards in all business dealings. This value emphasises transparency and reliability.

two

Innovation

- Continuously seeking new ways to improve products, services, or processes to stay ahead in the industry. Innovation fosters creativity and encourages forward-thinking solutions.

three

Customer Focus

- Placing the customer at the heart of the business by understanding and anticipating their needs. This value emphasises creating positive customer experiences and building lasting relationships.

four

Accountability

- Taking ownership of actions and outcomes, both individually and as an organisation. This value promotes responsibility, ensuring that commitments are fulfilled, and mistakes are learned from.

five

Collaboration

- Fostering teamwork and open communication within the company and with external partners. This value highlights the importance of working together to achieve common goals and deliver better results.
